Slewing ring bearing refurbishment is a valuable tool that minimizes downtime and increases the productivity of your heavy equipment. Bearing refurbishment saves about 50% of the cost of buying a new bearing. Refurbishments on bearings up to 124" OD can be completed in as little as one to two weeks. Refurbished bearings come complete with a written inspection, warranty, and certification.

# HOW IT WORKS

- 1) Send us the used bearing and we will perform a thorough inspection.

*Send slewing ring bearings to:*

CBS Bearing Services  
9420 Knight Rd  
Houston, TX 77045

- 2) Based on the condition of the bearing, a formal quote will be prepared and processing will begin following approval.
- 3) After the bearing is refurbished it will be prepared for shipment and returned as instructed.

## Bearing Manufacturing, Refurbishment, & Modifications of:

Ball Bearings

Rotary Table Bearings

Tapered Roller Bearings

Roller Bearings

Slewing Ring Bearings

Angular Contact Bearings

Roller Thrust Bearings
